

INTRODUCING TILT LATCH LOCK COMBO

Paradigm Windows now offers two new innovations and improvements to support the strength, performance and beauty that comes standard with every order. Available on our double hung 8-Series, the tilt latch lock and glazing bead combination is an excellent offering for those looking to improve performance without sacrificing beauty. These enhancements are also tailored for those looking for a more realistic wood-finished window alternative - while staying true to the quality, integrity and performance of Paradigm's vinyl window.

NEW TILT LATCH LOCK COMBINATION

- Available as an upgrade on our 8-Series double hung windows.
- This lock offers an incredibly clean and sleek look on the meeting rail.
- The lock technology is designed for ease of operation. Simply unlock the window and while the window is open, push the lock handles in to the "Wash" position and tilt the window in.

NEW GLAZING BEAD

- Available standard on our 8-Series double hung and slider windows.
- With beauty in mind, the glazing bead was designed to look more like wood.
- This contoured glazing bead differentiates the sash to create a more appealing finished look from the exterior.
