

WINDOW REPLACEMENT MADE EASY

APER  URE  
COLLECTION

Window replacement can be time-consuming, expensive and frustrating – but it doesn't have to be with Aperture Windows. When you choose Aperture, you receive customizable solutions and a dedicated and experienced contractor to install them for you.

If you want the best quality at affordable prices.

**Aperture is the clear choice.**

## Why Use an Aperture Contractor?

With the Aperture Collection, you receive your own dedicated and experienced contractor to complete the entire installation for you. Recognized for their knowledge, professionalism and reliability, Aperture contractors help you determine the right window solution for your home, assist you in the specifying and ordering process, and ensure the installation is accurate and efficient.

## Our Contractors Meet Extensive Criteria

- Must have all up to date insurance and licensing for local town/city/state
- Must be in good credit standing with their distributor/supplier
- No bankruptcies in the past 5 years
- Factory certified and trained through the Aperture Program's trainers
- Been in business for at least 3 years

**Aperture**  
is the clear  
choice.

## Aperture Window Features

### Foam Filled Frame and Components

High density polyurethane insulated frames and extrusions provide additional energy savings.

### Interlock

Sits flush when locked into place, providing best-in-class air seal and improved security.

### AnchorTite Weather Stripping

Providing an air leakage rate as low as .05cfm/sf – among the lowest in the industry.

### Equal Sash Sight Lines

The top and bottom sashes are equal, ensuring the look of a traditional window with improved exterior views.\*

### Proprietary Sill Dam

Sloped sill with I-beam reinforcement for added water protection, drainage and structural integrity.

\* Only applies to double-hung windows

## Performance Matters

From quality frame and sash materials, glass to LowE coatings, gas fills and spacer systems, a well-constructed window is engineered to help keep your home's temperature comfortable year-round.

Independent certification and testing laboratories like AAMA®, Energy Star® and NFRC® exist to maintain stringent industry standards and provide consumers with this information for making an informed decision.

Aperture products are **AAMA Gold Label Certified**. AAMA is an independent testing organization that sets standards on performance and quality for the window industry. This certification program requires every part used in the finished unit, pass a series of stringent performance tests. You can rest assured that our AAMA approved windows are of the highest quality, down to the last detail.

## Choose Your Glass Package

The right glass package is key to the performance of a window. You'll want to pay attention to the U-Value, which indicates the rate of heat flow through a window. The lower the number, the more energy-efficient.

All Aperture products use LowE insulating glass, which employs a high-performance coating designed to selectively reflect thermal and visible wavelengths. This allows the glass unit to both reflect heat where it's needed and provide a crystal-clear view. Other ultra-high performance glass configurations are available upon request.

### Ovation Glass Package

The Ovation glass package uses one LowE coating on the sealed side of the exterior pane and argon gas fill. Good for year-round insulating without excessive solar heating in the summer months.

**Better**  
**0.27**  
U-Value

### Encore Glass Package

The Encore glass package doubles the amount of LowE surfaces. This combination provides heat reflection from both panes. A thermally improved option, good for a wide range of demanding climates.

**Best**  
**0.24**  
U-Value

## Technology that Enhances Performance

All Aperture products are designed to meet ENERGY STAR® 6.0 requirements for the Northern zone. This means that whatever Mother Nature throws at you, your home will be prepared and protected.

With AnchorTite Weather Stripping, our windows lead the industry in air filtration performance and our Reliance Spacer System, keeps your window up to 21 degrees warmer than standard spacer systems.

## Reliance Spacer System

A spacer keeps a window's glass panes the correct distance apart. In some windows, the spacer in the window frame can be conductive, allowing valuable energy to escape. Our Reliance Spacer System reduces conductivity by 45% by eliminating metal components, allowing our products to maintain optimal thermal performance.

The graphic below shows that the Reliance Spacer achieves a temperature of +21.4 degrees warmer than other spacer systems. If the temperature outside is 0 degrees, and the interior temperature is 70 degrees, the "touch" temperature of the glass would be 46.6 degrees. This keeps the warm air in, maintaining a more consistent interior temperature

## Spacer Comparisons

up to **+21.4°F** warmer  
temperature at the  
edge of the glass

Outside 0° F  
Inside 70° F

## Window Types

Slider

Bay & Bow

Casement

Hopper

Awning

Geometric

Single Hung

Patio Doors

Other Custom Window Shapes and Mulled Configurations Available

## Options & Accessories

### Choose Your Casing

Exterior Casings for Aperture Windows are available in four-sided, three-sided with sill, and standard or offset configurations. Casings can be painted to match or contrast with your window color choice.

Flat Casing

Brickmould Casing

5-inch Brickmould

Standard vs. Offset Profile

### Autolock Comes Standard

Autolock hardware on Aperture Double Hung Windows automatically locks once the window sash is closed. For security and peace of mind, simply lower the sash and confirm that it has latched.

Available in these colors:

White

Black

Tan

Polished Nickel

Wood Grain

Mahogany

## Warranty

Your Aperture windows are backed by the best warranty in the business. Aperture offers a limited lifetime warranty available on all components, glass and paint – plus five years no-cost labor on service. We believe in our products and back them up with a manufacturer-provided labor warranty.

Our limited lifetime non-prorated warranty covers the entire window. Meaning, if the window fails during the warranty period, it's covered (replaced or repaired). Plus, it's completely transferrable to a second homeowner without a transfer fee.
